Feedback

Works in the iOS WKWebView, but not UIWebView.

1

Partial support in IE10 refers to support limited to touch screens.

2

Partial support in IE11 [documented here](#)

4

Partial support in Safari refers to not supporting the `none` keyword in `scroll-snap-points-x`, `scroll-snap-points-y` and `scroll-snap-coordinate`, and length keywords (`top`, `right`, etc.) in `scroll-snap-destination` and `scroll-snap-coordinate`.

5

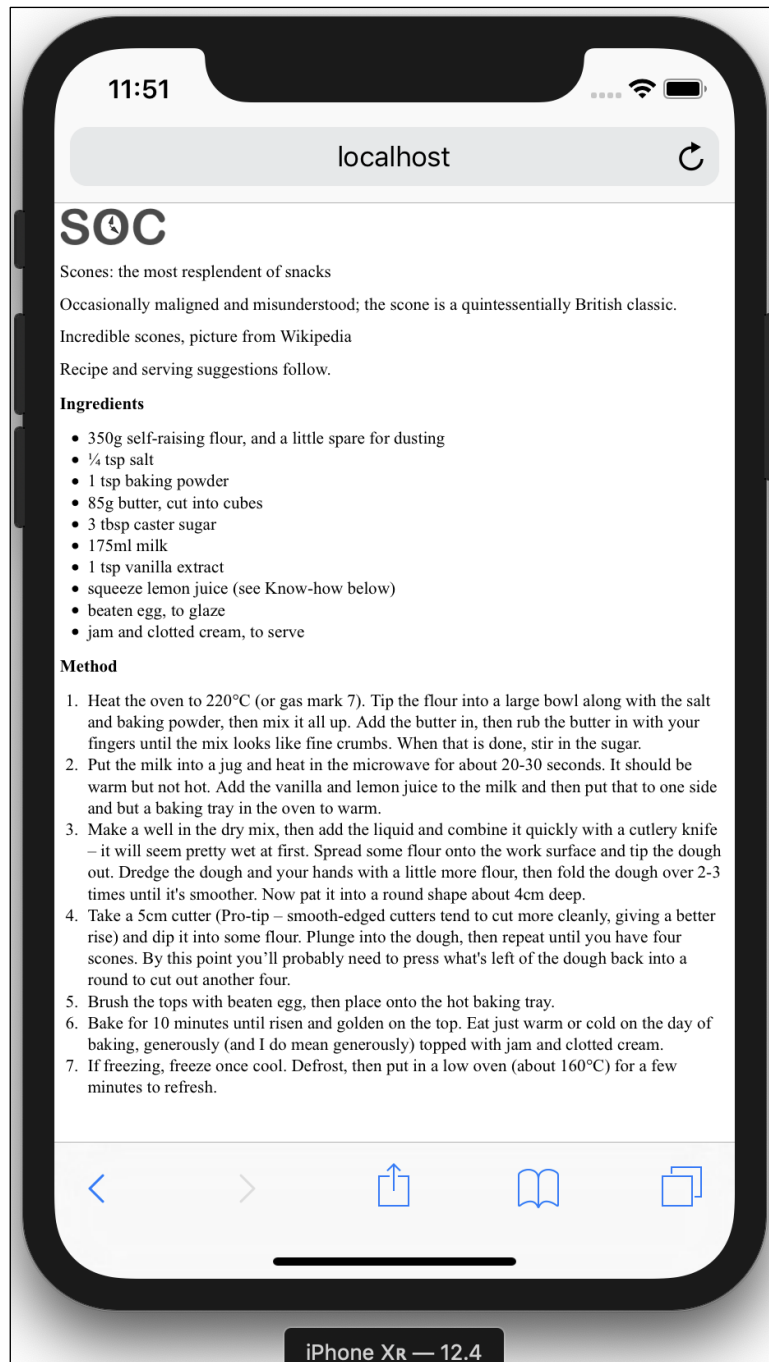

Supports properties from an [older version](#) of the spec.

6

Partial support in IE & Edge refers to not supporting `scroll-snap-coordinate` and `scroll-snap-destination`.

Scones: the most resplendent of snacks

Occasionally maligned and misunderstood; the scone is a quintessentially British classic.

Incredible scones, picture from Wikipedia

Recipe and serving suggestions follow.

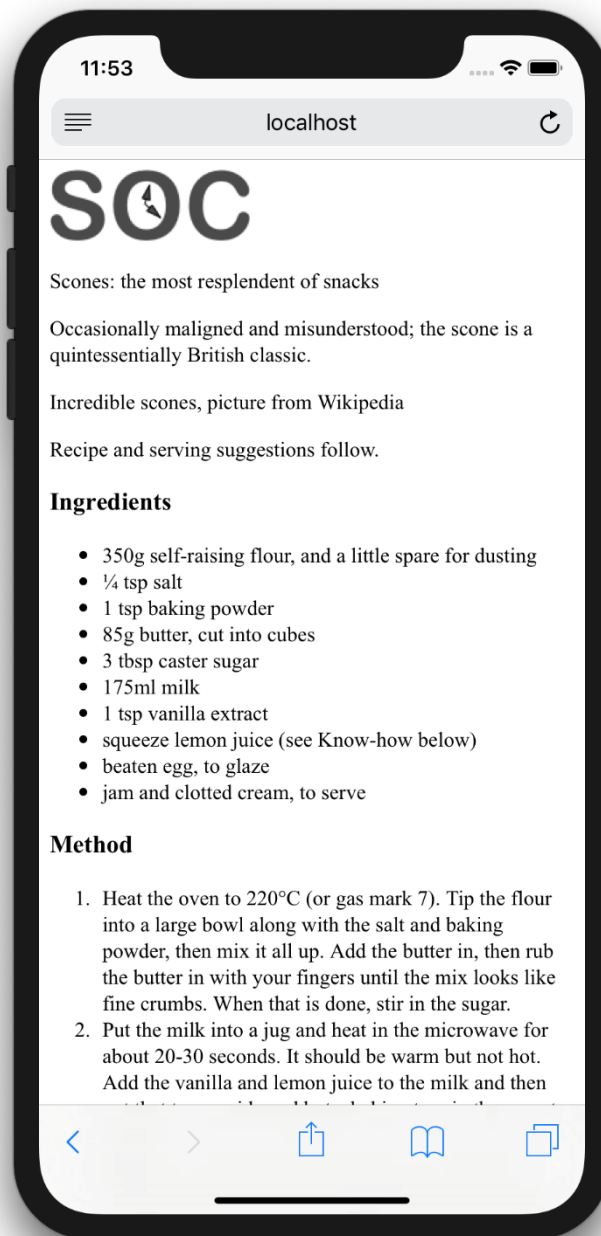

Ingredients

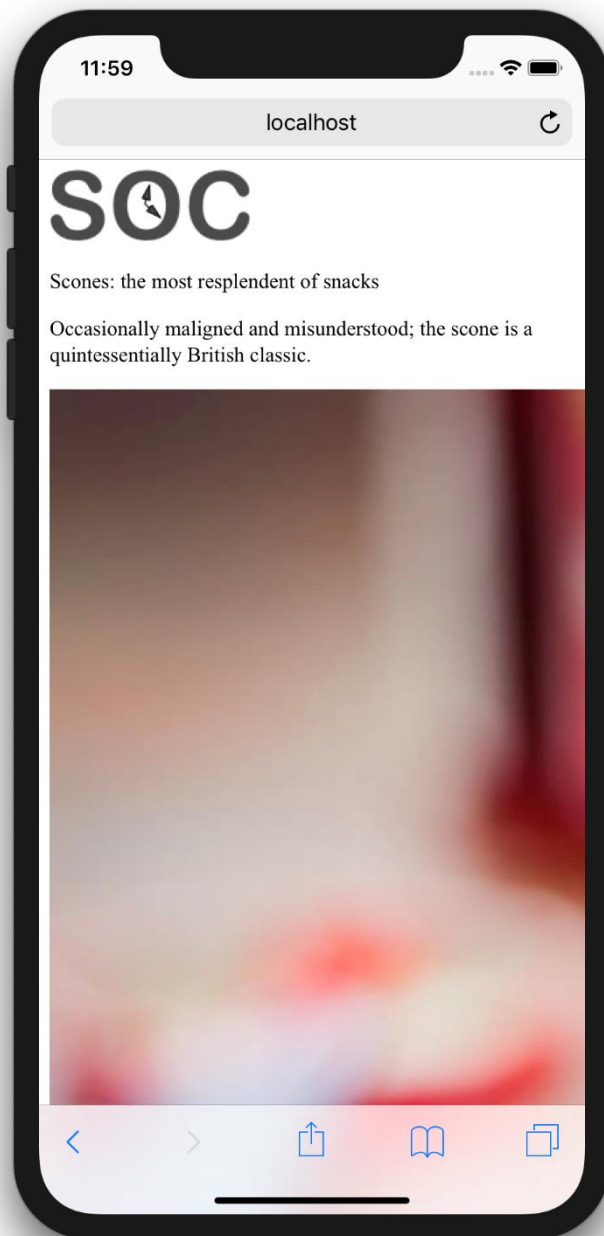

- 350g self-raising flour, and a little spare for dusting
- ¼ tsp salt
- 1 tsp baking powder
- 85g butter, cut into cubes
- 3 tbsp caster sugar
- 175ml milk
- 1 tsp vanilla extract
- squeeze lemon juice (see Know-how below)
- beaten egg, to glaze
- jam and clotted cream, to serve

Method

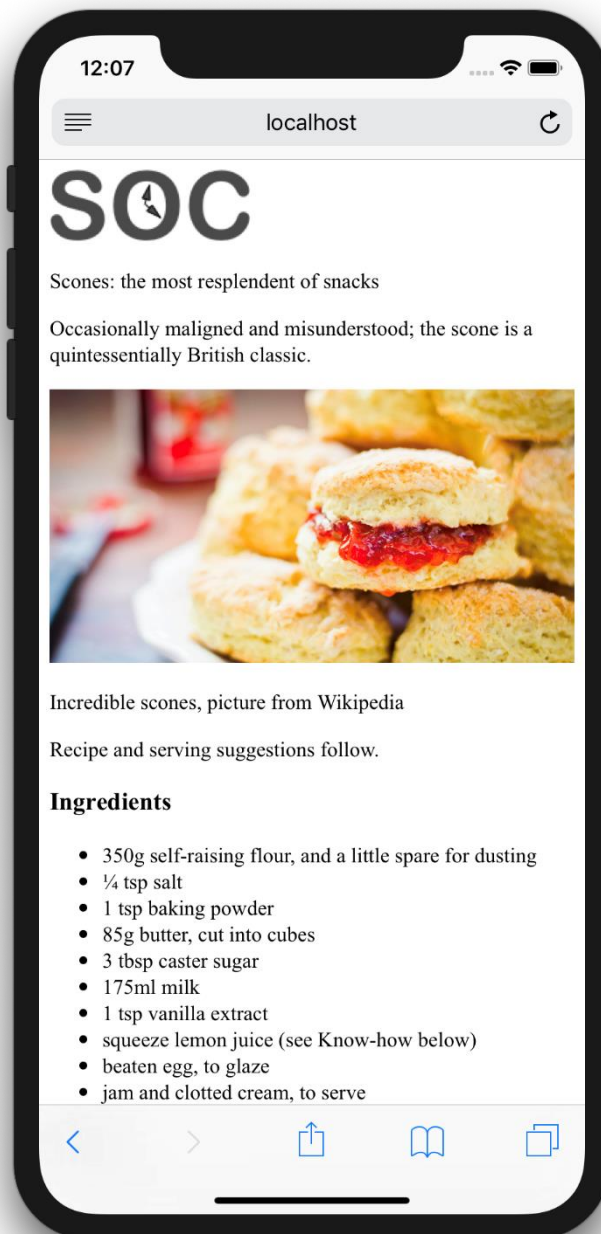

1. Heat the oven to 220°C (or gas mark 7). Tip the flour into a large bowl along with the salt and baking powder, then mix it all up. Add the butter in, then rub the butter in with your fingers until the mix looks like fine crumbs. When that is done, stir in the sugar.
2. Put the milk into a jug and heat in the microwave for about 20-30 seconds. It should be warm but not hot. Add the vanilla and lemon juice to the milk and then put that to one side and but a baking tray in the oven to warm.
3. Make a well in the dry mix, then add the liquid and combine it quickly with a cutlery knife – it will seem pretty wet at first. Spread some flour onto the work surface and tip the dough out. Dredge the dough and your hands with a little more flour, then fold the dough over 2-3 times until it's smoother. Now pat it into a round shape about 4cm deep.
4. Take a 5cm cutter (Pro-tip – smooth-edged cutters tend to cut more cleanly, giving a better rise) and dip it into some flour. Plunge into the dough, then repeat until you have four scones. By this point you'll probably need to press what's left of the dough back into a round to cut out another four.
5. Brush the tops with beaten egg, then place onto the hot baking tray.
6. Bake for 10 minutes until risen and golden on the top. Eat just warm or cold on the day of baking, generously (and I do mean generously) topped with jam and clotted cream.
7. If freezing, freeze once cool. Defrost, then put in a low oven (about 160°C) for a few minutes to refresh.

Chapter 02: Writing HTML Markup

3RD EDITION ▲

Responsive Web Design

WITH

HTML5

AND

CSS

Since 2012, 'Responsive Web Design with HTML5 and CSS' by Ben Frain, has been Packt publishing's best-selling book on Responsive Web Design and the latest HTML and CSS techniques and features.

Now completely updated 3rd Edition for 2020!

What's new in the 3rd Edition?

300+ INFO PACKED PAGES

Media queries, SVG, animations, CSS transforms, accessibility, Flexbox, CSS Grid, CSS Scroll Snap and much, much more.

SAMPLE CODE

Chapter code is available for each subject and you also get the code for this site. You'll be building it bit by bit as we progress!

LATEST EDITION

The 3rd Edition of Packt's best-selling Responsive Web Design title since 2012.

▲ IS IT FOR YOU?

This isn't a book for absolute beginners; you should have some understanding of HTML and CSS.

We will be taking this example site from nothing more than high quality HTML markup to fully responsive progressively enhanced website using the latest CSS techniques.

▲ WHAT YOU WILL LEARN

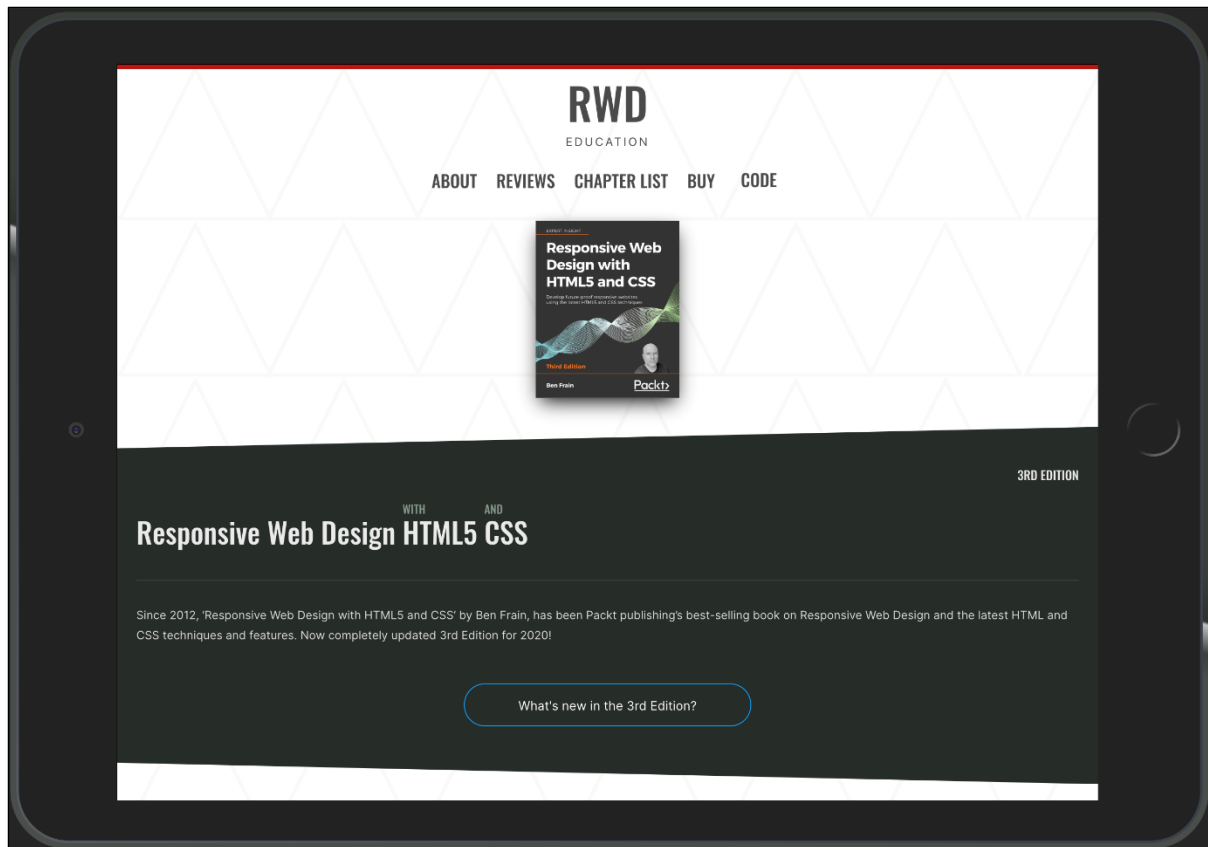

Each chapter will teach you the essentials of that subject, before putting the lessons learnt into practice to build this very site!

You'll learn everything you need to build fully responsive, modern web sites using the latest CSS and HTML features. Still unsure?

Chapter 03: Media Queries – Supporting Differing Viewports

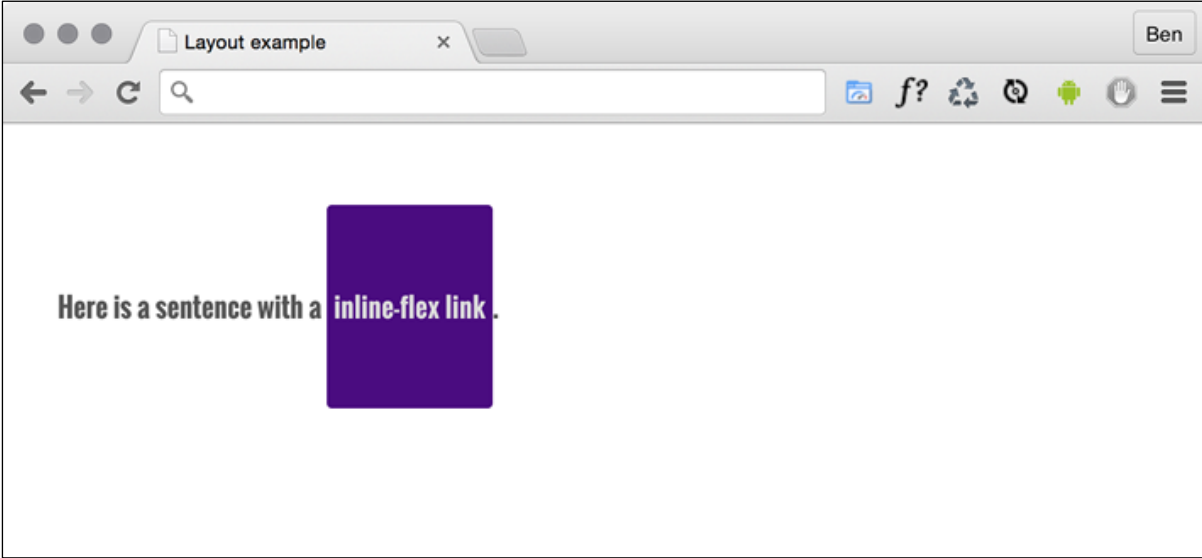

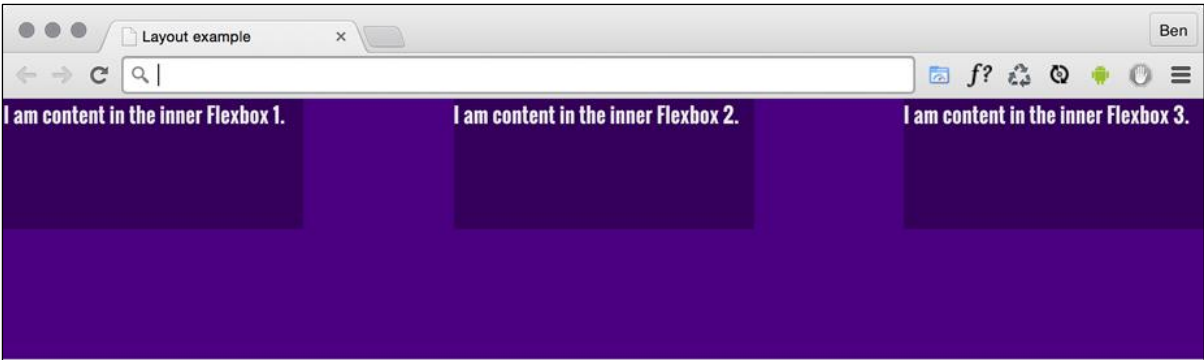

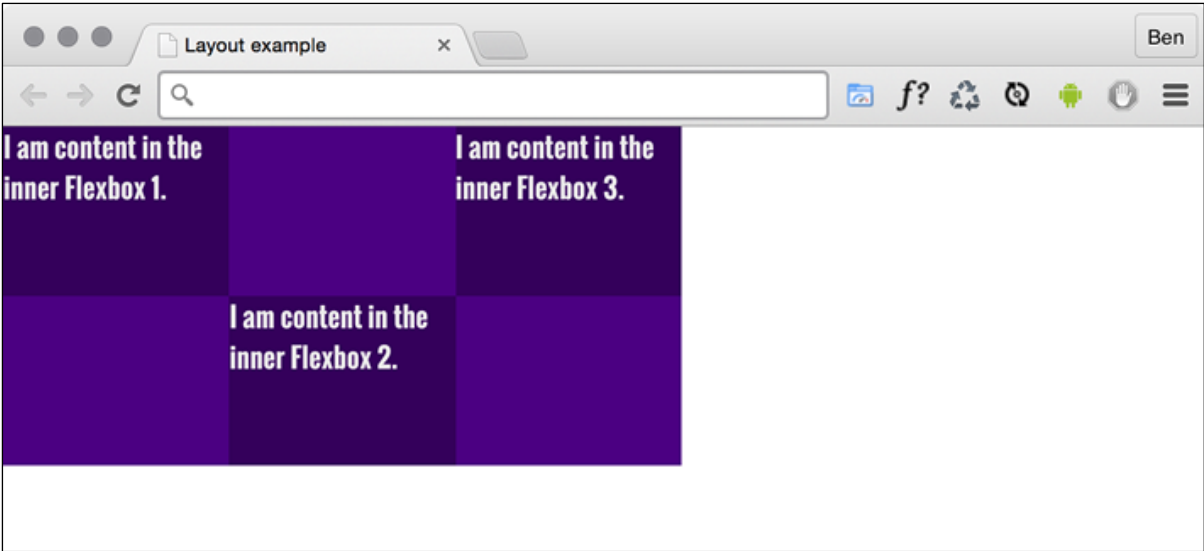

Chapter 04: Fluid Layout, Flexbox, and Responsive Images

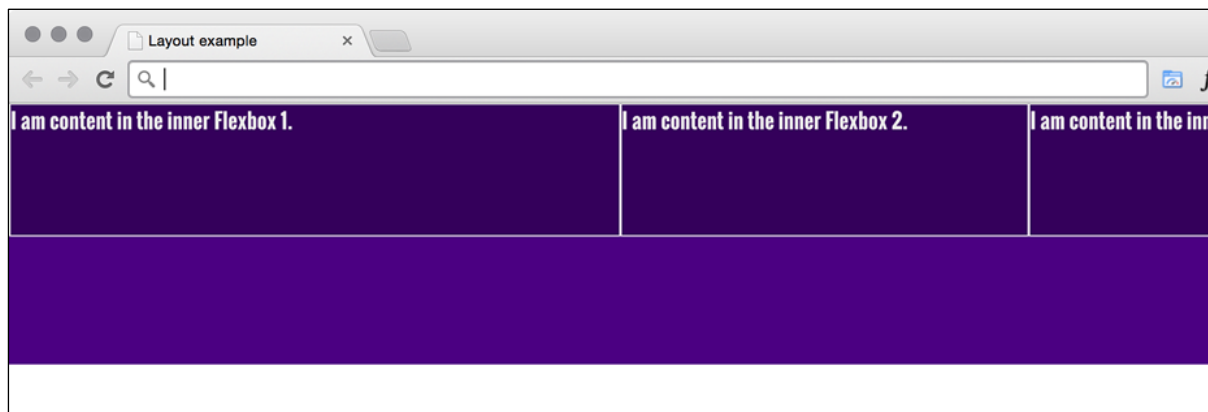

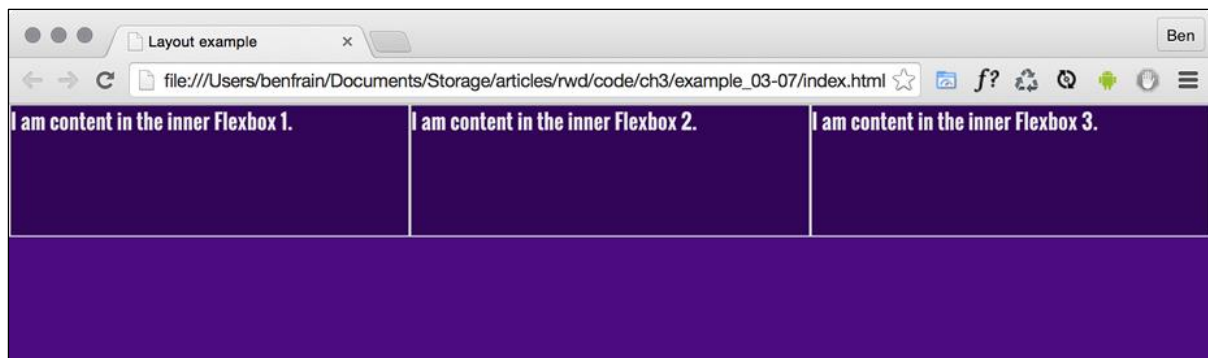

flex: 1 1 100px

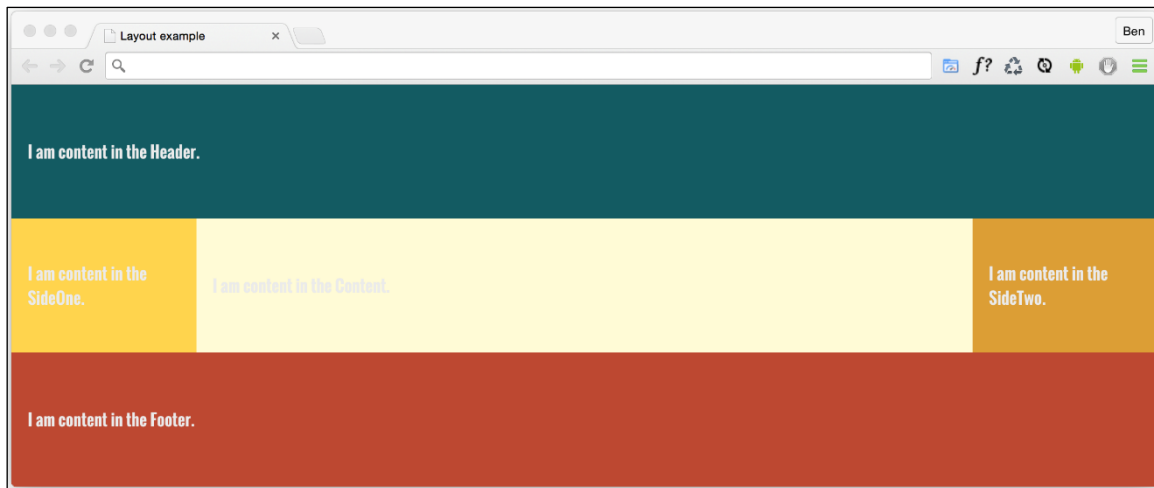

| | |

grow shrink basis

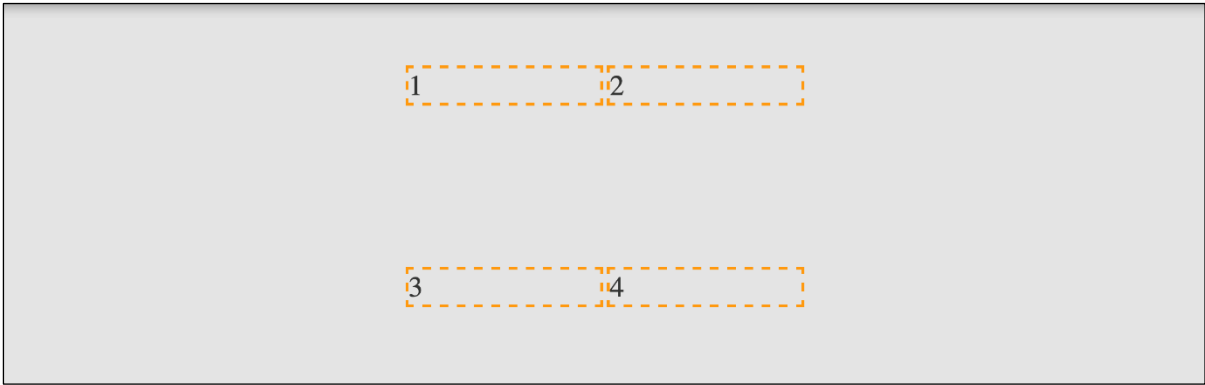

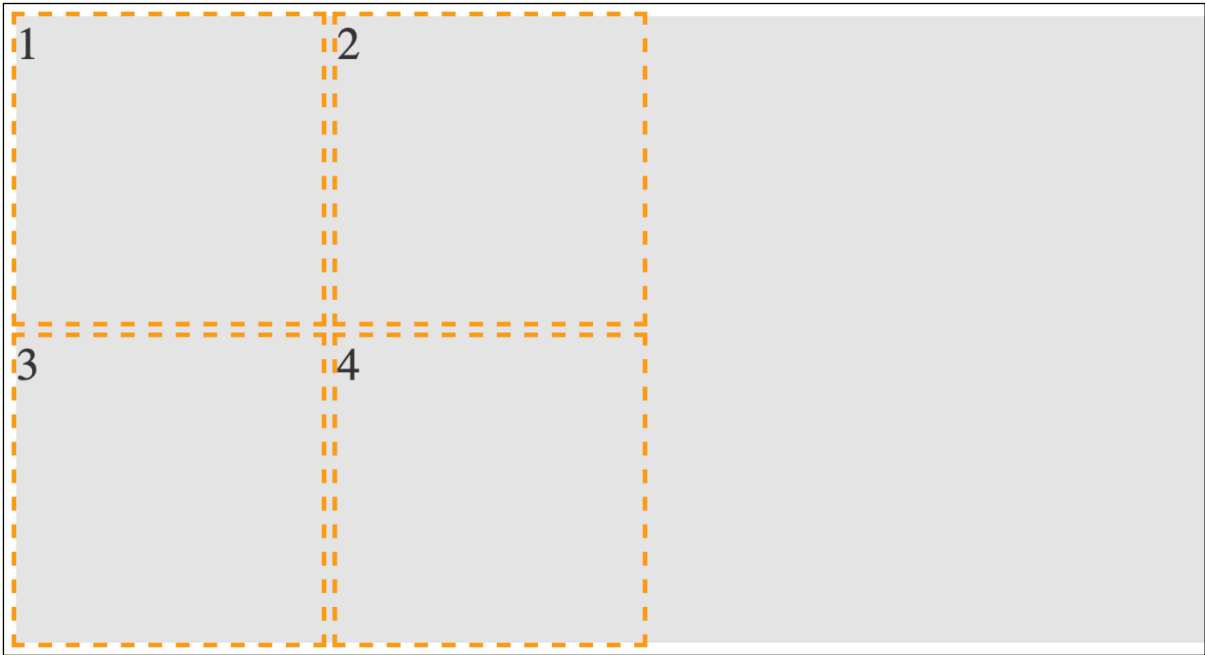

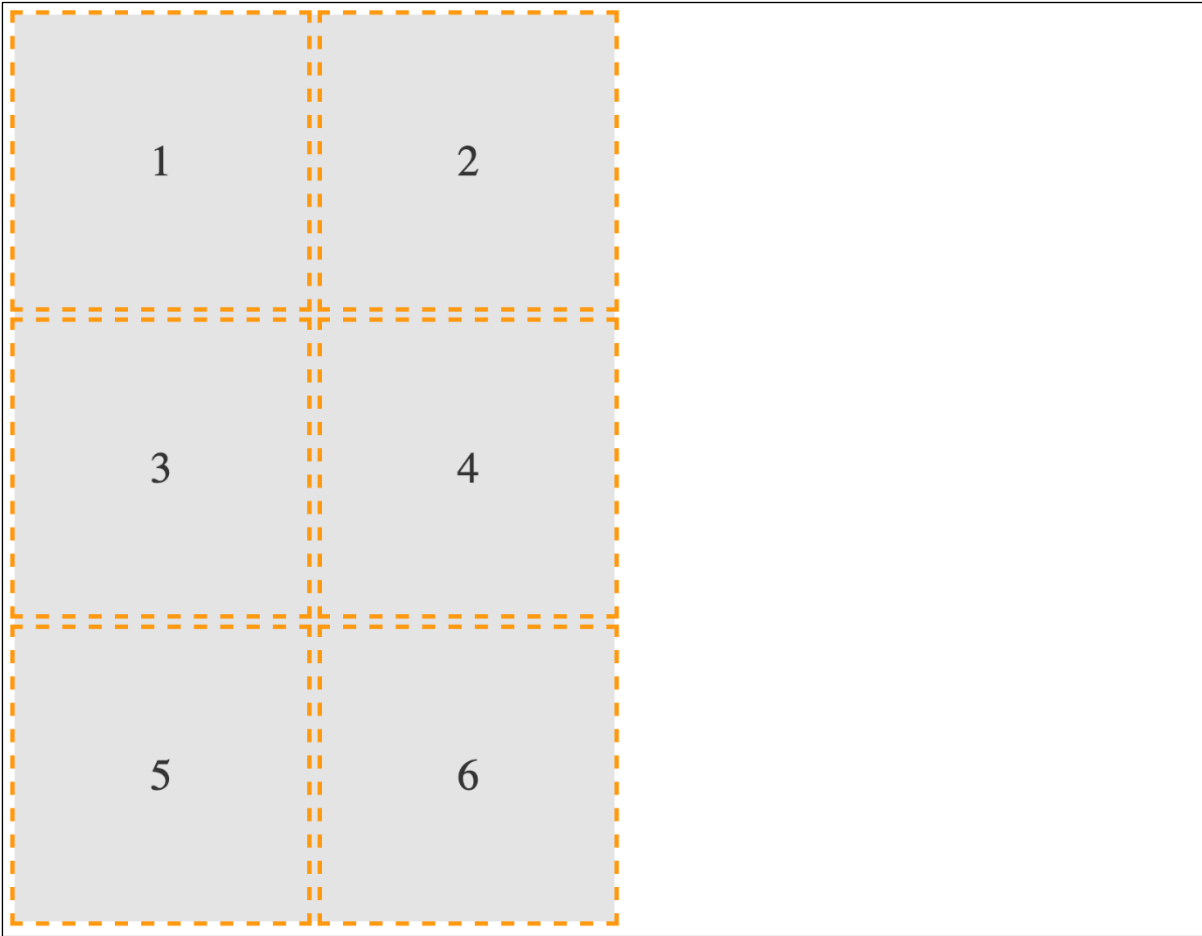

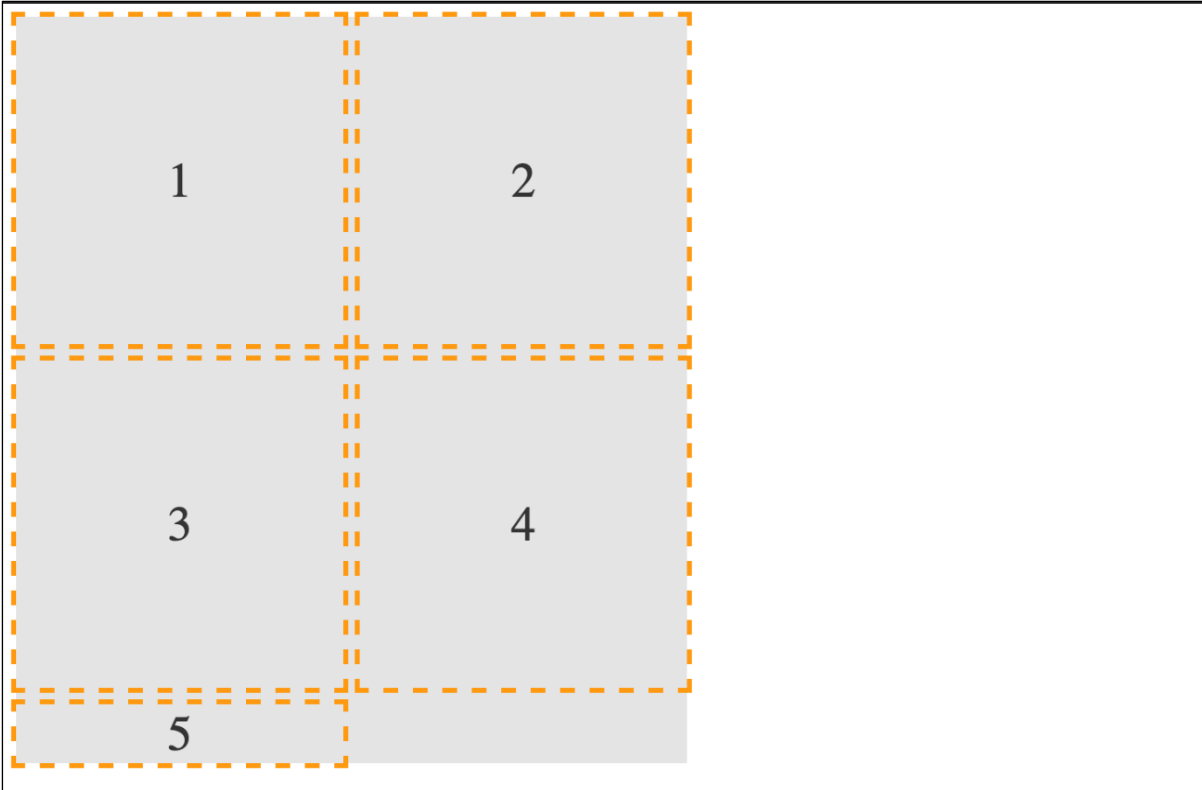

FULL CHAPTER LIST	
1	Essentials of Responsive Design By the end of this first chapter, you will have made a responsive web page. Along the way we will get an understanding of where Responsive Web Design came from, the problems it solves and the core tenants of implementing a Responsive Web Design with HTML5 and CSS3
2	Writing HTML markup Good HTML markup is the basis for any good web site or application. More importantly, HTML provides a bedrock of understanding for assistive technology. In this chapter we cover everything from the opening <code><!DOCTYPE html></code> to the closing tag.
3	Media Queries Media queries provide the means to target CSS not just on screen width, but screen height, color preference, screen density (DPI) and a whole lot more. We'll also look at CSS4 media queries like hover and pointer.
4	Fluid layout, Flexbox and Responsive Images Flexbox is the most widely supported modern CSS layout system. Once we have covered the syntax and use cases of Flexbox, we get our hands dirty with Flexbox; using it to layout the markup of this very site. This chapter also covers responsive images; allowing you to provide any number of image permutations for the target device.
5	Layout with Grid CSS Grid is the latest layout system. New in this edition is a whole chapter dedicated to understanding the capabilities and efficiencies of CSS Grid. Once we have an understanding we will use our new knowledge to make improvements to our existing implementation of a site design.

Dawn of the Planet of the Apes

If you can keep your head when all about you
Are losing theirs and blaming it on you;
If you can trust yourself when all men doubt you,
But make allowance for their doubting too:
If you can wait and not be tired by waiting,
Or, being lied about, don't deal in lies,
Or being hated don't give way to hating,
And yet don't look too good, nor talk too wise;

If you can dream- -and not make dreams your master;
If you can think- -and not make thoughts your aim,
If you can meet with Triumph and Disaster
And treat those two impostors just the same:.
If you can bear to hear the truth you've spoken
Twisted by knaves to make a trap for fools,
Or watch the things you gave your life to, broken,
And stoop and build'em up with worn-out tools;

If you can make one heap of all your winnings
And risk it on one turn of pitch-and-toss,
And lose, and start again at your beginnings,
And never breathe a word about your loss:
If you can force your heart and nerve and sinew
To serve your turn long after they are gone,
And so hold on when there is nothing in you
Except the Will which says to them: 'Hold on! '

If you can talk with crowds and keep your virtue,
Or walk with Kings- -nor lose the common touch,
If neither foes nor loving friends can hurt you,
If all men count with you, but none too much:
If you can fill the unforgiving minute
With sixty seconds' worth of distance run,
Yours is the Earth and everything that's in it,
And- -which is more- -you'll be a Man, my son!

-------	-------

link1	link2
-------	-------

Easing functions specify the rate of change of a parameter over time.

Objects in real life don't just start and stop instantly, and almost never move at a constant speed. When we open a drawer, we first move it quickly, and slow it down as it comes out. Drop something on the floor, and it will first accelerate downwards, and then bounce back up after hitting the floor. This page helps you choose the right easing function.

Chapter 10: Conquer Forms with HTML5 and CSS

Oscar Redemption

Here's your chance to set the record straight: tell us what year the wrong film got nominated, and which film should have received a nod...

About the offending film (part 1 of 3)

The film in question?

Year Of Crime

Award Won

Tell us why that's wrong?

How you rate it (1 is woeful, 10 is awesome-sauce)

What should have won? (part 2 of 3)

The film that should have won?

Tell us why it should have won?

How you rate it (1 is woeful, 10 is awesomesauce)

About you? (part 3 of 3)
